Capabilities Statement

AiOS Group is a Georgia-based company with roots in the K-12, government, state library, and private business markets. AiOS Group's leadership team and staff are seasoned IT and business executives with strong experience in designing and installing infrastructure for a new organization and retrofitting existing infrastructure. Our main services include network technologies (switches, wireless, firewalls), CAT6/fiber optic cabling as well as managed I.T. support.

AiOS Group offers comprehensive installation/configuration services on firewalls, switches, wireless access points, point-to-point wireless, security cameras, weatherproof network enclosures, uninterruptible power supplies (UPS), CAT6 & CAT6a cabling, coaxial cable, inside/outside plant fiber optics, directional boring and trenching as well as I.T. managed services.

Core Competencies

- Switches
